- **Scroll** to bottom of page to "Featured Topics"
- **Select:** Update on Oral Health Services Annual Report
 - **Nurse's Fluoride Varnish**
 - Pages 3, 5-6
 - **School Based Dental Prevention Program**
 - Pages 3, 5-6

Tennessee Oral Health Data

State and National Resources

Oral Health Services' annual report provides information on the activities and outcomes of the following programs:

- Nurse's Fluoride Varnish Program
- School Based Dental Prevention Program (SBDPP)
- Public Health Dental Clinical Facilities
- Dental Transport Programs
- Adult Dental Funding Program

Information on each of these programs may be found in the most recent report, Update or Oral Health Services Annual Report, January 2019. To access the data follow the link (1.) and instructions in the column to the right.

2. ***Tennessee Behavioral Risk Factor Surveillance System (TN BRFSS)***

The BRFSS is a state-based computer-assisted telephone interviewing effort conducted in cooperation with the Centers for Disease Control and Prevention (CDC). Additional information about TN BRFSS is available [here](#).

Information about access to dental services may be found in the 2016 Core Report. To access the data follow the link (2.) and instructions in the column to the right.

3. ***Tennessee Youth Risk Behavioral Surveillance System (YRBSS)***

TN YRBSS is a survey conducted by the Tennessee Department of Education which collects similar data to the Behavioral Risk Factor Surveillance System (BRFSS) in a younger population under 18 years of age). Tennessee currently collects data on high school students only.

Monitoring, Surveillance Systems

Current data on monitoring and surveillance systems in adults living in Tennessee is available from the state resource listed below. See information in the column to the right for accessing available information and data from the resource below.

Tennessee Department of Health Tennessee Birth Defects Surveillance System (TNBDSS)

During the period 2011 – 2016, there were 16,138 babies (about 2,690 babies per year) diagnosed with birth defects in Tennessee. The Tennessee Department of Health's Tennessee Birth Defects Surveillance System (TNBDSS) is a statewide surveillance program, outlined in Tennessee Code Annotated § 68-5-506.

Current data on birth defects in Tennessee may be found in the report, ***Tennessee Birth Defects Data Report 2011 – 2016***. Orofacial clefts, which include cleft lip and cleft palate, are among the birth defects discussed throughout the report.

For information specific to orofacial clefts, follow the link and instructions in the column to the right.
